EDUCATION

Universidad Politécnica de Valencia

Bachelor in Computer Engineering

Valencia, Spain

Graduation date – Nov. 2026

EXPERIENCE

Amazon Operations Intern

Amazon

Apr 2026 – Present

Madrid, Spain

- Designed and shipped an internal automation tool for shift distribution and workforce allocation, eliminating hours of manual coordination per week and materially improving scheduling efficiency.
- Built an internal workforce forecasting application used by HR the labor planning team to predict daily/weekly headcount from site rosters by modeling planned and unplanned absences, improving staffing decisions. Used internal AWS full stack integrated components (EC2, DynamoDB, Lambda, AWS Amplify...).
- Led teams of 40+ associates across multiple operational areas, consistently hitting productivity, safety, and quality targets in a high-volume, KPI-driven environment.
- Built lightweight reporting workflows to surface real-time performance signals, enabling faster escalation and corrective action across shifts.

Software Developer Intern

FacStructure

Jul 2021 – Sep 2023

Casablanca, Morocco

- Selected to return for three consecutive summer internships (2021, 2022, 2023) based on consistent delivery and ownership of high-impact projects.
- Architected a relational database schema on AWS and led end-to-end migration from physical archives to SQL Server, improving data retrieval performance and ensuring integrity across tens of thousands of records.
- Built a python script for automated batch ingestion pipelines for scanned documents and metadata, reducing manual processing time by over 70% and freeing operational capacity for higher-value work.

PROJECTS

Trakzi | *Next.js, React, Typescript, PostgreSQL, Redis, Gemini*

www.trakzi.com

- Built an all-in-one personal finance app that lets users import bank statements and receipts to keep their spending data in one place. Just surpassed the milestone of 500+ users.
- Implemented savings and financial planning features, including net worth tracking, goal-oriented insights, and mortgage calculation flows.
- Integrated AI-powered transaction categorization, conversational assistance, and analytical chart insights to help users better understand spending habits and budgeting patterns.
- Implemented collaborative money features for shared costs, including splitting expenses with friends or rooms and managing group balances.

UPV-Cal | *Next.js, React, TypeScript, Spring Boot, PostgreSQL*

www.upvcal.com

- Architected and deployed a full-stack exam scheduling platform used by 1000+ users.
- Designed RESTful backend services with Spring Boot for filtering, persistence, and data export.
- Modeled relational database schemas in PostgreSQL to support efficient querying and scalability.

TECHNICAL SKILLS

Technologies: Java, Python, JavaScript, TypeScript, SQL, C/C++, Spring Boot, Node.js, REST APIs, React, Next.js, HTML, CSS, TailwindCSS, PostgreSQL, Supabase, Neon, Redis

Tools: Git, Postman, AWS, Docker, Kubernetes

LANGUAGES

Languages: English (Fluent), Spanish (Native), French (Native C1), Arabic (Native)

OTHER ACHIEVEMENTS

- Cloud Computing with AWS Certificate (UPV)
- Finalist in Mercadona IT Hackathon
